

DAN OLSON

VIDEO EDITOR / VIDEO PRODUCER / CAMERA OPERATOR

As long as I can remember, I have been fascinated with the synchronization of audio with video. After teaching myself how to create video content using non-linear editing software, I earned a job editing wedding videos and enrolled at Platt college in San Diego where I graduated with a BS in Media Arts. I now currently work at Sony Playstation as a video editor, video engineer, camera operator, game capture; motion capture; face scanning; and other tasks that require efficiently and precision. My goal is to create feelings through video, reminding people how art can create emotions nothing else could ever touch.

EXPERIENCE

2009-2011
Video Editor
NR3 Weddings
